High-end US Seminar Radiologists for radiologists

What?

Seminar designed for radiology consultants, registrars and trainees.

A three-day sonography course for radiologists, with seminars and practical training with models. This course is the perfect opportunity to enhance and update your knowledge and skills in sonography with radiology experts to share their best practices.

Aim of the course

- Learning the standard examination with the reference US images of the joints of the lower limb.
- Practicing in intensive hand-on training sessions how to make the reference images and how to perform the dynamic imaging.
- Standard reporting of pathology of the lower limb.

Programme

Thursday 14 sept: Theoretical course: US Anatomy and pathology of the lower limb (Dr. J. Veryser)

9-9.30: US anatomy of the foot

9.30-10.30: US anatomy of the ankle

10.45-12: Pathology of the ankle and foot
